

# Hills muck-away & haulage

Hills operates a comprehensive muck-away and site clearance service covering the whole of Wiltshire and large parts of neighbouring counties. With trucks of all sizes and a network of fully licensed disposal sites for inert, hazardous and non-hazardous wastes, we are uniquely placed to offer customers in our area a professional site clearance service.

One of our great strengths lies in the sheer size and scope of our truck fleet - from four, six and eight-wheel rigid tippers through to 29-tonne articulated tippers. Every vehicle is satellite-tracked and linked to our base by radio in order to ensure an efficient service.

The fact that we are also one of the region's leading waste disposal and recycling operators and a registered carrier means that we are well-placed to meet our customers' duty of care responsibilities. Whatever the type of material you have for disposal and whatever its classification, we have the right facility. It doesn't matter whether you are a house builder or groundworker with a site to clear or a developer looking to dispose of contaminated soil, we have the solutions and we cover your legal responsibilities.

We also have a network of quarries that can deliver any of a wide range of aggregates, concrete and screed.

## Our fleet

A dedicated fleet of vehicles including:

4-wheel rigid tippers - 11-tonne payload

6-wheel rigid tippers - 16-tonne payload
