

Hills ensuring concrete quality

When you buy concrete from Hills you get the peace of mind of quality assured plants and processes. Our production plants at Shorncote near Cirencester, Lower Compton just outside Calne and Woodsford near Dorchester, operate to the highest industry standards. We also operate a technical support service and you will find supporting material on our website at www.hills-group.co.uk/concrete.php

QUALITY

Our ready-mixed concrete is accredited to national standards. The stamp of quality is assured by the fact that the company has been awarded QSRMC certification, the best-known and most widely specified certification mark for ready-mixed concrete.

QSRMC is an independent certification body for ready-mixed concrete. Companies awarded QSRMC certification are licensed to use the QSRMC certification mark on literature and documentation, including quotations and delivery tickets.

TECHNICAL

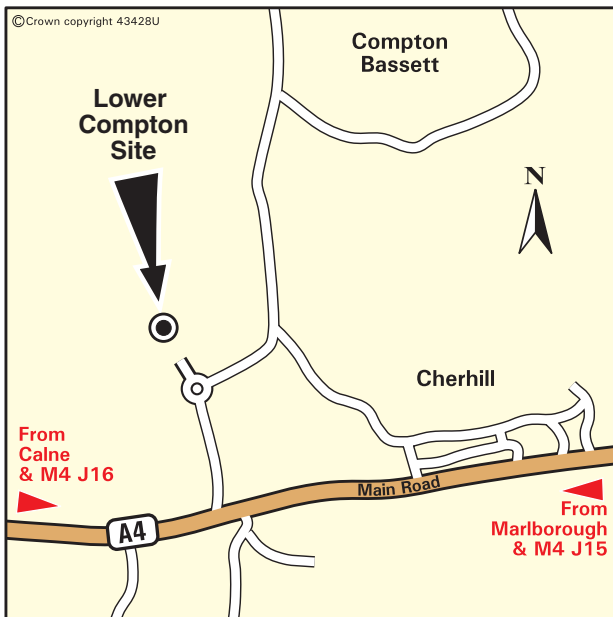

Our concretes are produced to the latest standards and QSRMC regulations. We regularly test to ensure that standards are maintained and can arrange for specific customer deliveries to be tested by prior arrangement. A charge may be incurred for that service.

In order to assist our customers, we have assembled a series of commonly-asked questions and answers, and a good practice guide, both of which are available from our website www.hills-group.co.uk/concrete.php. The guide takes you through the key stages in laying successful concrete. If you have not worked with concrete previously please read through that section of our site and note the safety warnings in particular.
