

hills woodsford quarry

The opening of Woodsford Quarry marks the arrival of the family-owned Hills Group in Dorset.

Located five miles east of Dorchester, the new quarry has state-of-the-art facilities for the production of both aggregates and ready-mixed concrete. It is ideally placed to deliver right across Dorset and into Somerset. We can supply to projects of all sizes, from major civil engineering contracts to wide ranging construction applications, builders' merchants, small housing sites, farms and sports facilities. We also specialise in tailor-made supply agreements for builders' merchants.

Please give us a call if you need anything that is not shown here, or if you would like us to create a tailor-made product to meet your own specification. Our technical sales staff are always on hand and keen to help.

DORSET RANGE	Product	Typical uses
SAND		
	Building sand	<ul style="list-style-type: none"> • general building sand • cable laying sand • blinding sand • sand bags
	0mm - 2mm fine concreting sand	<ul style="list-style-type: none"> • screed • lime mortar mix • fine concreting sand
	0mm - 4mm medium concreting sand	<ul style="list-style-type: none"> • block paving • screed • coarse concreting sand
FLINT		
	4mm - 6mm flint	<ul style="list-style-type: none"> • decorative • drainage medium
	10mm - 20mm flint	<ul style="list-style-type: none"> • decorative • drainage medium
	20mm - 40mm flint	<ul style="list-style-type: none"> • decorative • drainage medium

	40mm gravel	<ul style="list-style-type: none"> • land drainage 		20mm ballast	<ul style="list-style-type: none"> • concrete mix

CONCRETE

We offer a full range of ready-mixed concrete to suit all requirements:

- Ready-mixed concrete – produced to the British and European Standards of BS 8500 and BS EN 206. The stamp of quality is assured by the fact that Hills has been awarded QSRMC certification, the best-known and most widely specified certification mark for ready-mixed concrete. We regularly test our product to ensure that standards are maintained.
- Mini-mix loads – with a capacity of up to four cubic metres, we are able to provide a dedicated service to customers who only require small volumes or where the delivery site may have access or weight restrictions. The right choice for drives, paths, patios, small foundations and bases.
- Floor screed – uses a specially selected Bristol channel dredged sand for a superior laying and finish, and incorporates a retarder which delays setting for a sufficient period to lay, compact and finish the screed.

Our aim is to ensure that our customers receive the right concrete for the job and in order to assist, we have assembled a series of commonly-asked questions and answers, and a good practice guide, on our website www.hills-group.co.uk.
