

construction aggregates

Hills has been providing materials to the construction industry in Wiltshire, Oxfordshire and Gloucestershire for more than 100 years. Today, we stretch a bit further afield into areas such as Dorset, but we remain as committed as ever to the quality of our aggregates.

We have also grown our range well beyond basic sand, gravel and stone. While our mainline construction aggregate range is shown here, do contact us if you have a need that is not shown and we will do our best to assist.

Roads	6F5
	40mm scalpings
	Type 1
	125mm clean stone
