

## Maintenance supervisor, Westbury

The 18 month construction project to build Wiltshire's first state-of-the-art waste treatment plant is nearing completion and recruitment opportunities for a number of posts have now arisen.

The Northacre resource recovery centre in Westbury will use mechanical biological treatment technology to process 60,000 tonnes of household waste. It represents a significant investment by Hills Waste Solutions and is a key element in the strategy to reduce waste to landfill.

We are looking for a new team to join the company and be part of this exciting new development.

### **Maintenance supervisor**

Reporting directly to the plant manager the main purpose of this role is to ensure the continuous and efficient running of the MBT facility, with regards to electrical and mechanical requirements and to supervise the electrical technician, the mechanical technician, apprentices and contractors, and assist in their duties to maintain the plant where necessary. You will suggest and plan suitable maintenance proposals in order to maximise efficiency and ensure downtime and costs are minimal.

Successful candidates must have a background in the management and supervision of plant maintenance and maintenance teams within a process or manufacturing plant environment. You should have proven experience with emphasis on electrical or mechanical expertise, be IT literate and have awareness of health and safety and environmental issues.

**Please contact the Hills recruitment hotline on 01672 518951 for an application pack, quoting the vacancy reference HGL 354.**

*The Hills group is committed to monitoring and maintaining equal opportunities and welcomes applications from all sections of the community.*
