

## Mechanical technician, Westbury

The 18 month construction project to build Wiltshire's first state-of-the-art waste treatment plant is nearing completion and recruitment opportunities for a number of posts have now arisen.

The Northacre resource recovery centre in Westbury will use mechanical biological treatment technology to process 60,000 tonnes of household waste. It represents a significant investment by Hills Waste Solutions and is a key element in the strategy to reduce waste to landfill.

We are looking for a new team to join the company and be part of this exciting new development.

### **Mechanical technician**

Reporting to the maintenance supervisor the main purpose of this role is to undertake maintenance works as required to include troubleshooting and installation of pneumatic, hydraulic and mechanical systems. You will maintain the MBT facility in order to achieve the required level of performance and propose relevant measures to increase efficiency and productivity. Then post holder will be required to assist the electrical technician and ensure all relevant documents, records and files are kept up to date.

You must have fitting and machining experience and be a capable welder. You should have held previous roles within a process plant or manufacturing environment and be knowledgeable with pneumatic diagnostics.

**Please contact the Hills recruitment hotline on 01672 518951 for an application pack, quoting the vacancy reference HGL 355.**

*The Hills group is committed to monitoring and maintaining equal opportunities and welcomes applications from all sections of the community.*
