

## Electrical technician, Westbury

The 18 month construction project to build Wiltshire's first state-of-the-art waste treatment plant is nearing completion and recruitment opportunities for a number of posts have now arisen.

The Northacre resource recovery centre in Westbury will use mechanical biological treatment technology to process 60,000 tonnes of household waste. It represents a significant investment by Hills Waste Solutions and is a key element in the strategy to reduce waste to landfill.

We are looking for a new team to join the company and be part of this exciting new development.

### **Electrical technician**

Reporting to the maintenance supervisor the main duties for this post holder will be to undertake instrumentation and electrical maintenance as required. This will include troubleshooting, repair and installation of instrumentation and electrical power systems. You will maintain the MBT facility and carry out any repairs to enable the plant to operate at maximum efficiency and achieve required levels of output. The successful candidate will be required to assist the mechanical technician and ensure all records and documents are kept up to date.

Candidates must have experience working within a process plant or manufacturing environment; be qualified to IEE 17<sup>th</sup> edition and have experience with PLC programme/diagnostics, electrical diagnosing and instrument calibration.

**Please contact the Hills recruitment hotline on 01672 518951 for an application pack, quoting the vacancy reference HGL 356.**

*The Hills group is committed to monitoring and maintaining equal opportunities and welcomes applications from all sections of the community.*
