

**NEWS RELEASE – 31 March 2015**

## **Top safety accreditation for Hills Waste Solutions**

Wiltshire-based Hills Waste Solutions has been awarded accreditation from Safecontractor for its commitment to achieving excellence in health and safety.

Safecontractor is a leading third party accreditation scheme which recognises very high standards in health and safety management amongst UK contractors.

Employing nearly 300 people, Hills Waste Solutions offers a range of specialist waste management and recycling services to both public and private sector customers such as Wiltshire Council, Honda of the UK Manufacturing, CenterParcs and Aspire Defence Services Limited (ADSL).

Gary McKinnon, commercial manager for Hills Waste Solutions, said: "Securing the Safecontractor accreditation further demonstrates our health and safety competence to both new and existing clients and will assist in growing and developing our business."

Safecontractor is applicable to most sectors although it is particularly relevant to food manufacture, property, facilities management, retail and leisure sectors, all of which are big users of contracted services.

John Kinge, technical director of Safecontractor said, "Major organisations simply cannot afford to run the risk of employing contractors who are not able to prove that they have sound health and safety policies in place."

"More companies need to understand the importance of adopting good risk management in the way that Hills has done. The firm's high standard has set an example which hopefully will be followed by other companies within the sector. Safecontractor plays a vital role in supporting our clients in meeting their compliance needs, whilst working with their contractors as they progress through the accreditation process."

Under the Safecontractor scheme, businesses undergo a vetting process which examines health and safety procedures and their track record for safe practice. Those companies meeting the high standard are included on a database, which is accessible to registered users only via a website.

Client-organisations who sign up to the scheme can access the database, enabling them to vet potential contractors. These clients agree that, as users of the scheme, they will engage only those who have received accreditation.

Over 210 major, nation-wide businesses, from several key sectors, have signed up to use the scheme when selecting contractors for services such as building, cleaning, maintenance, refurbishment or electrical and mechanical work. **ENDS**

Notes to editors:

**Hills Waste Solutions.** It is a dynamic regional business which, while centred on Wiltshire, has stretched its boundaries into neighbouring areas to become one of the region's largest providers of waste solutions. Hills Waste Solutions is a wholly owned subsidiary of The Hills Group Limited, a privately owned family company established in 1900.
